REBEL ATTORNEYS EXCLUDED. The recent decision of the Supreme Court pronouncing the test oath for rebel attorneys unconstitutional, made it obligatory upon Congress to do something in the premises which has been done by the passage of a bill introduced by ex Governor Boutwell, of Massachusetts, which excludes from all the courts of the United States all lawyers who have "been guilty of treason, bribery, murder, or other felony, or who has been engaged in any rebellion against the Government of the United States in armed hostility thereto," and the above provisions were made a rule for all courts of the United States. We have read the proceedings on this bill, in the Congressional Globe, with great interest. Of course it was fought with great vehemence by the copperhead members. The parliamentary contest was warm and exciting. The speech of Mr. Boutwell was short and pointed, and when he said, "If a majority of the Supreme Court haun't respect enough to adopt rules excluding rebels and traitors from the bar of that Court, it was time for the legislative power to slip in and make rules for them," the copperheads hissed, and declared the Government was going to ruin, but the Republican members and the galleries, answered the sentiment with hearty applause. The bill was passed by a large majority.

We are very happy to publish the following letter from Governor Crawford. So far as he is concerned, nothing more can be desired by any friend of the Normal School. The letter speaks for itself. It was written in answer to a note of in quiry which Mr. Kellogg addressed to the

Torsea, Kansas, Jan. 23, 1867. DEAR SIR:-Your favor of the 16th inst. is at hand. In reply, permit me to say that I regret very much to learn that a portion of my last message was not entirely satisfactory to some of the friends of the State Normal School. There was certainly no intention on my part to do or say anything that would work an injury to that or any other of our public institutions; but on the contrary it has ever been my earnest desire to do atl in my power towards building up and making them what the friends of education would have them-second to those of no

During the past two years I havelabored earnestly, not only as a Director but as Governor, to advance the interests of the State Normal School. I have, on all occasions, spoken of it in the most favorable terms; and in my opinion, if the friends of the institution will examine carefully the article refered to, they will find no real cause for complaint.

I have not seen the article referred to in the Bulletin, but the one accompanying your letter was, in my judgment, unwarrantable, especially when I have on all occasions shown a perfect willingness Jenkins, Jewitt, Mcfutosh, Miller, Mob

I have not intentionally given any person cause for believing that I entertain suspicions that all things are not as they should be in regard to the management of the Normal School, because it has been managed to my entire satisfaction, and so far as I know to the satisfaction of the other Directors.

The Board of Directors have labored under more than the usual embarassments experienced in building up an institution of this kind, but now, as you are aware, they have mostly been overcome, and the school is flourishing under the most favorable suspices; and I assure you that in the future as in the past, you can rely upon my assistance in every measure that I believe to be right.

I am very respectfully, Your Obt. Servant, S. J. CRAWFORD. L. B. Kellogg, Principal, State Normal School.

SPEAKER PLUMB.

### For The Emporis News. INTEREST.

The accusation I wish to bring against our Legislators is that they have overstepped, in many things, their proper funcmuch barm; though doubtless without intending harm. The love of exercising power is so universal that no class of maintain order, laws to protect the weak from the power of the strong, and laws respecting public health, are about the only services Legislators can render to the interests of the people.

That these are of much value no one can deny; and yet it cannot be said by even these is civilization alvanced or the progress of man accelerated. They only afford the opportunity for progress; the rolls were called, with the following the progress itself depending on other circumstances. And that this is a sound riew of Legislation, seems evident from the fact, that an knowledge is being diffus ed, thus enabling each succeeding generation to understand the relations of life, so in the same proportion are men insist-
